

A NEW WAY TO KILL WEEDS ON CONTACT

New Suerte™ from Sipcam Agro is a non-selective contact herbicide for use wherever elimination of unwanted broadleaf weeds and grasses is desired. Suerte works fast by penetrating the plant tissue and disrupting normal cellular processes which results in the death of all contacted tissues. Visible results are achieved within minutes.

Suerte is particularly well suited for use as a burndown product, or for use in cracks and crevices, sidewalks, fence lines, driveways, around buildings and homes or other areas with undesired foliage.

SUERTE HERBICIDE OVERVIEW

- » Non-selective contact herbicide
- » Works fast; visible results within 15 minutes
- » Kills a wide range of broadleaf weeds and grasses
- » Half-life of 24 hours
- » No harmful residues
- » Can be used with other post-emergent herbicides

UNIQUELY EFFECTIVE WEED CONTROL

Suerte is a fatty acid soap product (ammonium nonanoate) that penetrates the cell walls of plants and disrupts the organization of physiological functions which are compartmentalized by membranes within the cell walls. Plant growth ceases when cellular contents are mixed, which causes brown necrotic plant tissue. Suerte does not migrate through the soil and is not translocated in plants. Plant leaves must be thoroughly and uniformly covered to ensure satisfactory control.

BROADLEAF WEEDS

Algae	Mustards
Bittercress, hairy	Oxalis or woodsorrel
Chickweed, common	Pansy, wild
Chickweed, mouse-ear	Plantain
Cocklebur, common	Pigweed, smooth and redroot
Corn spurry	Mallow, roundleaved
Cudweed, purple	Moneywort
Groundsel	Shepherd's purse
Lambsquarters, common	Sorrel, sheep
Liverwort	Spurge, spotted
Marestail or horseweed rosettes	Field pennycress
Morning glory, annual	Velvetleaf
Moss	

GRASSES AND OTHER WEEDS

Bentgrass, colonial
Bluegrass, annual
Crabgrass, large
Fescue, creeping red
Fescue, hard
Nimblewill
Onion, wild
Ryegrass, perennial
Star of Bethlehem

DIFFICULT WEEDS*

Bermudagrass (wireweed)
Bindweed, field
Dandelion
Nutsedge, yellow
Ragweed, common

*Use 13-15% V/V Suerte for control or suppression

FEATURES & BENEFITS

- » Unique active ingredient
- » Provides control and burndown suppression of annual and perennial broadleaf and grass weeds
- » Also controls spore-producing plants such as mosses and liverworts
- » Non-volatile and completely water soluble; requires nominal mixing
- » May improve efficiency of other post-emergent herbicides
