

RAMP UP YOUR FUNGICIDE REGIMEN

Bring on your best season yet with the dual forces of Brixen™ and Potente®. When you combine the advanced disease-fighting power of Brixen with the innovative plant health benefits of Potente, you get a winning combination with unmatched ROI.

Brixen is the only fully-loaded tetraconazole + azoxystrobin fungicide in the market, offering proven broad-spectrum control to knock out disease and keep it down. And Potente is a unique amino-acid solution that provides nutrient support to crops during critical periods for enhanced vitality and stronger yields. Together, these two products form a powerful duo that produce more vigorous crops and an outstanding yield potential.

POTENTE: THE BOOST YOUR CROPS NEED.

- » Supports resistance to biotic and abiotic stress
- » Complete aminogram designed to provide a quick shot of energy when the plant needs it most
- » Supports plant metabolism for increased chlorophyll production and root growth
- » Optimizes efficiency of plant nutrition and pesticide treatments

BRIXEN: DISEASE PROTECTION THAT DOESN'T QUIT.

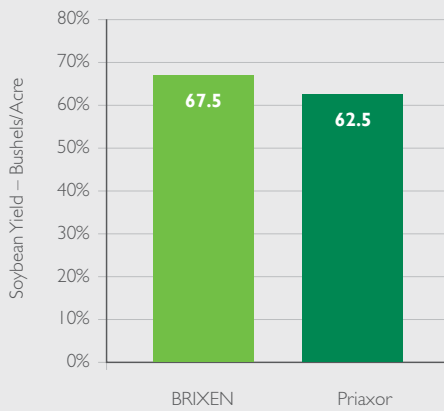

- » Combines a fast-acting strobilurin with a highly effective, long-lasting triazole
- » Broad-spectrum preventative and curative fungicide with systemic properties
- » Two modes of action for more powerful control
- » Ideal formulation for disease resistance management

PROVEN SOLUTIONS FOR EXCEPTIONAL RESULTS

Field trials performed across the midwestern United States show that applying Brixen results in lower disease rates, with yields comparable to or greater than in crops where a competing fungicide was applied. In addition, field trials for Potente have shown that, when used with tetraconazole, yields have improved by up to 33%. When combined, Brixen and Potente have the potential to boost yields even higher due to the addition of azoxystrobin.

SAME PERFORMANCE. BETTER ROI.

Soybeans treated with Brixen resulted in comparable yields to those treated with Priaxor®.

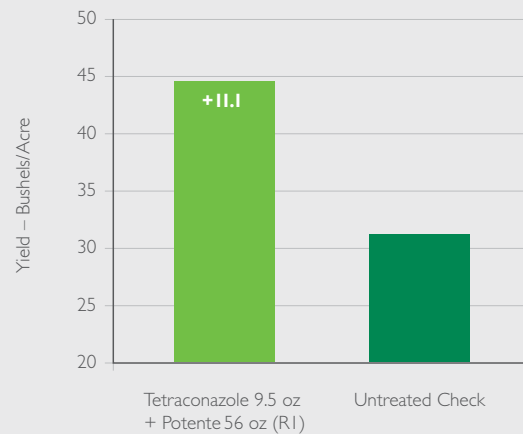

Based on a 2018 Mid-Michigan Agronomy soybean fungicide trial performed in Dundee, MI.

1. Brixen (tetraconazole + azoxystrobin); 16 fl oz/A (B)
2. Priaxor (fluxapyroxad + pyraclostrobin); 8 fl oz/A (B)

STRONG CROPS. STRONGER YIELDS.

Soybeans treated with Potente and tetraconazole resulted in about 33% higher yields than untreated crops.

Based on a study performed by University of Illinois.

Tetraconazole 9.5 oz + Potente 56 oz (R1) vs. Untreated check

BRIXEN & POTENTE TANK MIX RATES

CORN	V4 – V7	13 oz BRIXEN/13 oz POTENTE
	VT	13 oz BRIXEN/10 oz POTENTE
SOYBEAN	R3	13 oz BRIXEN/13 oz POTENTE
	R5	13 oz BRIXEN/10 oz POTENTE
