

ARIUS™ 250

FUNGICIDE

LONG-LASTING DISEASE CONTROL

Keep yield-robbing diseases under control with Arius 250, a broad-spectrum systemic fungicide that's ideal for corn, soybeans and a wide variety of other crops. This product features rapid and complete plant uptake for outstanding protection against Anthracnose leaf blight, soybean rust and other harmful diseases. Plus, with its application flexibility and long-lasting control, Arius 250 provides the coverage your crops need for a healthy, productive season.

ARIUS 250 FUNGICIDE OVERVIEW

- » Broad-spectrum control -effective on four major fungi groups
- » Rapid and complete plant uptake
- » Long-lasting control
- » Excellent tool for preventive disease management programs

KEY BENEFITS

- » Registered for use on a wide range of crops
- » Offers application flexibility
- » Great tank-mix partner for a number of fungicides

D. White, University of Minnesota Extension

RECOMMENDED USE RATES*

Soybean/Corn: 6.0–15.5 fl. oz./acre

PACKAGING

2 × 2.5-gal. case

* Check label for specific use restrictions and rate recommendations by crop

D. Malvick, University of Minnesota Extension

CROPS LABELED*

- » Almonds
- » Artichoke
- » Asparagus
- » Barley
- » Berries
- » Brassica
- » Bulb vegetables
- » Carrots
- » Corn
- » Cucurbits
- » Fruiting vegetables
- » Grapes
- » Herbs
- » Spices
- » Leafy vegetables
- » Legume vegetables
- » Peanuts
- » Pecans
- » Pistachios
- » Potatoes
- » Rice
- » Soybeans
- » Stone fruit
- » Tomatoes
- » Tree nuts
- » Root and tuber vegetables
- » Wheat and triticale
- » Wild rice

ACTIVE INGREDIENT

Azoxystrobin

CLASS CODE

II

* Check label for specific use restrictions and rate recommendations by crop

DISEASES CONTROLLED*

- » Aerial blight (*Rhizoctonia solani*)
- » Alternaria leaf spot (*Alternaria* spp.)
- » Anthracnose (*Colletotrichum truncatum*)
- » Brown spot (*Septoria glycines*)
- » Cercospora blight and leaf spot (*Cercospora kikuchii*)
- » Frogeye leaf spot (*Cercospora soja*)
- » Pod and stem blight (*Diaporthe phaseolorum*)
- » Soybean rust (*Phakopsora* spp.)
- » *Rhizoctonia solani* (*Rhizoctonia solani*)
- » Southern blight (*Sclerotium rolfsii*)
- » Eye spot (*Aureobasidium zeae*)
- » Gray leaf spot (*Cercospora sorghi*)
- » Northern corn leaf blight (*Setosphaeria turcica*)
- » Northern corn leaf spot (*Cochliobolus carbonum*)
- » Southern corn leaf blight (*Cochliobolus heterostrophus*)
- » Corn rust (*Puccinia sorghi*)
