

FAMILY OF PRODUCTS

PROVEN CONTACT AGRICULTURAL FUNGICIDES

Consistently high yields aren't possible without effective control of tough-to-manage diseases. That's why growers count on the Echo® family of agricultural fungicides: Echo® 720 Agricultural Fungicide, Echo® 90DF Agricultural Fungicide and Echo® ZN Agricultural Fungicide. Powered by the longtime performer chlorothalonil, Echo 720 and Echo 90DF, plus Echo ZN with the addition of zinc, are all designed to give growers proven, broad-spectrum control for diseases in many row and tree/nut/vine cropping systems.

Echo 720, Echo 90DF, and Echo ZN are easy to use and are excellent performers either alone or as tank-mix partners in an overall fungicide spray program. The Echo® family is also a cornerstone of your comprehensive fungicide resistance management program.

ECHO AGRICULTURAL FUNGICIDES OVERVIEW

Active Ingredient: Chlorothalonil
FRAC Code: M5

- » Multiple-site protection that offers excellent disease protection with low resistance risk
- » Premium formulation, natural adhesion to plant surface
- » Highly compatible with other fungicides in an overall fungicide resistance management strategy
- » Ideal for use with newer fungicides to manage the risk of fungicide resistance and broaden their disease control spectrum

THE VERSATILITY OF ECHO 720, 90DF AND ZN AGRICULTURAL FUNGICIDES

LABELED CROPS

almonds	cranberries	mint*	pistachio
asparagus	cucurbits	mushroom beds	potato
